Enventure Launches Enhanced Web Site Featuring New Technical Library

HOUSTON – January 20, 2009 - Enventure Global Technology, the provider of SET® solid expandable technology, announced the launch of an enhanced web site (www.EnventureGT.com) that showcases the company's technology and applications, and hosts an improved technical library.

As the pioneer in solid expandable technology, Enventure is known for its overwhelming experience and record-breaking installation achievements. The new site, reflective of the company's new brand image, is graphically enhanced, clean and more user-friendly. A wealth of practical technical information about solid expandables is the key enhancement to the site set against the backdrop of a decade of experience, a thousand installations and a 95.6 percent success rate.

“As the internet continues to transform what information is available, it is easy to become inundated with too much data,” said Kevin Waddell, Enventure's vice president of Business Development & Solutions. “The goal of our site is to provide a one-stop SET technology resource that will enhance information exchange, continue industry education, and initiate a running dialogue about advancements in expandable technology. We are committed to providing our customers with a simple site providing the latest information to help our customers make informed decisions.”

The web site hosts an improved technical library, which includes case histories, data sheets, technical papers and industry articles that all track the diverse technology applications and the evolution of their use since the first solid expandable installation in 1999.

The new site not only presents technology offerings more clearly, it also explains the benefits of expandable technology in various applications through brief and concise overviews. For example, a visitor can quickly read how to enhance production in multi-well programs as well as how expandables used in side-tracking applications help reach stranded reserves and ensure maximum internal diameter at total depth.

Enventure

Houston-based Enventure Global Technology, L.L.C. continues to be the world's leading provider of solid expandable technology solutions for the energy industry. The company has a global presence with operations in North America, the Middle East, Asia Pacific, South America, Europe and the Far East. For more information, visit www.EnventureGT.com.
