ENVENTURE GLOBAL TECHNOLOGY OPENS NEW EASTERN HEMISPHERE HEADQUARTERS

HOUSTON, December 11, 2006—Enventure Global Technology, the industry leader in Solid Expandable Tubular (SET®) technology, recently announced the opening of its new Eastern Hemisphere headquarters in the Dubai International Financial Centre. The move and expansion underscores the legacy established with more than 130 SET installations in the Eastern Hemisphere.

“This office represents a culmination of the hard work put forth by our personnel in a worldwide arena,” said Robert Hinkel, president and chief executive officer of Enventure.

Enventure’s dynamic and growing business in the region necessitated the move to larger office space. The Middle East comprises more than 20 percent of Enventure’s work worldwide as well as total footage of installed pipe to date.

“We anticipate the Middle East to continue to be a core market for SET technology. This office positions us to aptly respond to sales and operational demands that are inherent in robust regions,” explained Mark Rivenbark, Enventure’s general manager of the Middle East.

Enventure

Houston-based Enventure Global Technology, L.L.C., the world's leading provider of solid expandable tubular (SET®) solutions for the energy industry, is owned by Shell Technology Ventures and Halliburton Energy Services. Organized in 1998, the company has a global presence with operations in North America, the Middle East, Asia Pacific, South America, Europe and the Far East.
