ENVENTURE EXPANDS EXPERTISE IN CANADA

HOUSTON, January 15, 2008— Enventure Global Technology announces the newest addition to its North America team. Jolene Chipiuk, Technical Sales Representative, headquartered in Calgary, will lead Enventure’s advancement of solid expandable technology (SET®) for the Canadian sector.

“We are entering the Canadian market in earnest and Jolene will help Enventure establish a permanent presence,” said Chan Daigle, Enventure’s vice-president of North America sales and operations. “Having Jolene in the region gives our customers a dedicated point of contact as our operations takes off in Canada.”

Chipiuk joins Enventure with a Bachelor of Science degree from the University of Alberta with an emphasis in chemistry and physics. She was previously in a business development role for a major service provider in Calgary, specializing in prospecting and delivery of high-tech components for smart wells, reservoir monitoring and fiber optics systems.

Enventure’s Regional Sales Manager Mark Holland said, “Jolene brings expertise to existing field work as well as the more complex, frontier environments found in Western Alberta, British Columbia and East Coast Canadian plays. Wellbore remediation, repair and abandonment are some of the key drivers for placing a local, regional representative in the area as well as slimmed well-bore drilling efficiencies needed for tough drilling conditions along the Front Range and British Columbia Nikanassin plays.

Enventure

Houston-based Enventure Global Technology, L.L.C. is the world's leading provider of solid expandable technology solutions for the energy industry. The company has a global presence with operations in North America, the Middle East, Asia Pacific, South America, Europe and the Far East. For more information, visit www.EnventureGT.com.
