Enventure Achieves Record Setting 1000th Expandable Job

Expandable Technology Pioneer Builds Upon Record-Setting Portfolio

HOUSTON (November 7, 2008) - Enventure Global Technology, the pioneer in solid expandable technology, reached a major milestone with its 1,000th SET[®] expandable job.

The installation demonstrates the acceptance and diversity of the technology and Enventure's place as the leading technology innovator and experienced service provider.

Using exclusive SET technology, Enventure installed a 47 ft 7-5/8 x 9-5/8 in. 36.0 lb/ft expandable Cased-Hole Liner to cover damaged casing near the surface of the well.

Like many SET system applications, the 1,000th expandable job enabled the customer to continue their drilling program. To date Enventure has installed expandable systems in more than 30 countries for 146 operators. SET systems can be installed in casing sizes ranging from 3-1/2 in. to 16 in.; in lengths of less than 30 ft to over 6,700 ft; and in well depths exceeding 28,000 ft.

“This milestone achievement illustrates how our experience and expertise continues to provide our customers with the highest levels of service and technology,” Enventure President & CEO, Ray Ballantyne said. “It is a reminder to us that while each job we do may vary in size and complexity, the results are always significant to our customers.”

Some of the previous records set by the Enventure include the first commercial solid expandable installation in 1999 and the longest solid expandable installation in 2007.

Enventure

Houston-based Enventure Global Technology, L.L.C., in its 10th year of service, continues to be the world's leading provider of solid expandable technology solutions for the energy industry. The company has a global presence with operations in North America, the Middle East, Asia Pacific, South America, Europe and the Far East. For more information, visit www.EnventureGT.com.
